## Prevent Damage Before It Happens

The Tronair Stabilizing Stand Alarm is designed to provide a unique sound warning alarm if excess weight is lowered onto the stabilizing stand

*“This device can save big money because I’ve seen incidents cost between \$20,000 to \$100,000. This kit can prevent damage before it happens”*  
GSE Team Leader, Battle Creek, Michigan

## Stabilizing Stand Alarm Kits

The Stabilizing Stand Alarm Kit was designed as an early warning device in case a load of 100 lbs is put on the stabilizing stand.

The alarm blasts an 85 dB unique sound when the weight exceeds its rated capacity and it chirps when the 9V battery gets low.

The kit can be retrofitted to most existing Tronair Stabilizing Stand. The kit can also be purchased and installed with most new Stabilizing Stands.

### Standard Features:

- Adjustable weight capacity
- Easy installation to existing stabilizing stands
- Shield protects alarm from damage
- 85 dB unique alarm
- 9V battery system
- Chirping circuit indicates low battery
- Durable Power Coat Tronair Blue
